Priority: 10 / Highest

Estimate time: 6 / 1.5 week

Acceptance criteria:

1) Admin must be logged in.

2) Admin must fill in the title, description for the new job category.

3) Admin can delete categories.

4) Admin can edit categories.

Project planning

Iteration 1

Finishing the documentation, create the schedule, create 3 GET API's, research Java and spring boot.

Iteration 2

Connecting the application to the online database. researching how to secure my project

Iteration 3

Starting with the front-end of the project and being able to implement the user stories like (US1 , US2, US3, US4)

Iteration 4

Continuing with the project, implement and test the rest of the user stories at the same time

Iteration 5

Finishing the overall design of the application. Improving certain aspects wherever it's needed.

Iteration 6

End of project.
